A vocational doctoral certificate programme provides career-specific advancement opportunities to executives and professionals who often perceive academic doctorate studies as something out-of-reach and beyond their intellectual capacity. It allows them to pursue such high-level scholarly activities by leveraging on their existing job-related expertise and experience, hence removing the fear of dropping out without successful completion. Needless to say, a vocational doctoral certificate programme is both cost-effective as well as time-saving. Since research for vocational doctorate programme is situated within the context of the adult student's own job role and functions, it is no surprise that the level of motivation throughout the study duration is optimal.

In keeping with the spirit of EIU to innovate new paradigms in personal and professional development, and for the first time ever in the history of mankind, we are proud to launch our unique vocational doctorate degree programmes.

At EIU, working adults who wish to upgrade and certify themselves to the highest level of professional excellence are able to do so through our revolutionary research-based PROFESSIONAL DOCTORATE programme in a wide range of specialization areas
