

Course Name:	Project Management
Duration:	3 months
Level:	Certificate
Mode of Learning:	Online
Prerequisite:	Mature Entry (21years) with 3 years related work experience, 5 CXC certificates (Math and English mandatory), Any certifications relevant to subject matter

Abstract

This course serves as a gentle introduction to Project management for students with little or no prior experience. The course will focus on core skills associated with the field while also providing a holistic look at management as a whole and the various disciplines. Whether you're an up-and-coming professional, an experienced executive, aspiring manager, budding Professional, this course is an opportunity to sharpen your project management skills and knowledge.

Course Content

This course is broken down into 30 lessons including self-assessment quiz to measure progress in learning.

- Understand what is necessary to complete a project successfully and be able to plan and execute the project.
- Gain an immersive understanding of the practices and skills needed to succeed in a project management role.
- Learn how to create effective project documentation and artifacts throughout the various phases of a project.
- Practice strategic communication, problem-solving, project-risk analysis, communication management, procurement management, PMO and stakeholder management through real-world scenarios videos and learning material.
